

Whole-House Filter Cartridge Combination Guidelines

Combo 1: 1st Housing - PP Sediment, 2nd Housing - PP Activated Carbon.

Combo 2: 1st Housing - PP Sediment, 2nd Housing - Disruptor™ 5293 PAC-S.

Combo 3: 1st Housing - PP Activated Carbon, 2nd Housing - Disruptor™ 5293 PAC-S.

Which combo works for you?

Note: it is important to look at the table below to ensure that the combo of filters you purchase will remove the contaminants you need it to. If you are unsure which filters you require, please feel free to contact us for advice and guidance.

Major contaminants	PP Sediment	PP Activated Carbon	Disruptor™ 5293 PAC-S
Sediment	✓	✓	✓
Particulates	✓	✓	✓
Chlorine		✓	✓
Endotoxin			✓
Viruses			✓
E. coli			✓
Bacteria			✓
Cysts & parasites			✓
Legionella			✓
Trace pharmaceuticals			✓
VOC (volatile organic compounds)			✓
Some heavy metals (lead, copper & iron)			✓
Polysaccharides (TEP)			✓

Suitable water sources

- 1** Municipal Water
- 2** Borehole Water
- 3** Rainwater

It is important that the water source is appropriately controlled.

Note: borehole water should be tested to ensure that it is safe for domestic use. Water quality, volume of consumption and the combination of filter cartridges will all influence the effectiveness and lifespan of your filters.

For detailed installation and usage instructions, please refer to the installation manual on our website.
