

Water storage as unique as your household

Your home is one of a kind - and your water storage solution should be too. That's why JoJo offers a wide range of tanks to suit your unique space requirements and personal taste.

JoJo's Quality Commitment

We invest in designs, technologies and capabilities that uphold our purpose.

JoJo's popular water tanks comply with the national tank standard for water tanks, SANS 1731:2017 at all eight of our operations, and come with a 40-year-plus track record and 10-year warranty. Each JoJo tank is a quality, long-term investment designed to serve a purpose and add value.

UV-stabilised outer layer withstands the harsh African climate

Black inner layer prevents algae growth

BPA-free, food-grade layer prevents leaching of harmful chemicals and protects the quality of the water stored

No vertical joints or weak points in the layers for added strength

Greater thickness at the bottom of the tank provides the required strength to withstand the pressure from the liquid stored

Closely spaced ribs at the bottom of the tank provides added strength

Lids are secured with spring-loaded e-clips as an additional safety measure in the event that the tank overflows

Tanks are supplied with high-quality, practical fittings designed for use with our accessory range, to extend the versatility and allow for easy DIY installations

Tanks can be manufactured in a range of colours to suit various preferences and unique aesthetic requirements

Our colour pigments have the best weather- and light fastness properties for extended outdoor use without fading

Iconic contemporary design with unique sharp lines and finishes

10 YEAR WARRANTY

Water tank colour range

Which tank is your ideal storage solution?

Vertical

Slimline

Low Profile

Horizontal

Underground

1 | Consider your space

If you have limited space, our Slimline tanks are the ideal solution as the range was specifically designed with space restrictions taken into consideration.

If you need a larger tank to store more water, but have height restrictions, the low profile or horizontal tanks will be the perfect choice.

If aesthetics are of concern or no floor space is available, you have the option of an underground water tank specifically designed to withstand pressure when empty.

Ultimately, if space is not a problem and optimal water storage is the goal, consider our larger vertical water tank range for maximum storage.

2 | Consider the application

The intended use of the stored water will determine the size of the tank that you will need.

Rainwater Harvesting

Consider the following:

- Rainfall in your area
- Your roof size
- The water usage

Note: The biggest downfall of rainwater harvesting is lack of storage capacity.

Municipal Backup

Consider the following:

- How many people you require back up water for
- How long you would like your back up water to last

A good way to calculate, would be to use 150L per person per day (the average in South Africa).

Fully Integrated System

Consider the following:

- How much municipal water you would like available as back up (see municipal backup section), then add the amount you would like to harvest in rainwater. You will require more storage capacity for this system.

Vertical Water Storage Tanks

TANK	DIAMETER	HEIGHT	CODE	AVAILABILITY	WARRANTY
260L	670mm	940mm	260LT	S	3-year
500L	840mm	1 080mm	500	S	3-year

If a smaller underground water storage tank is required, any of our conservancy tanks can be utilised for water storage. Just ensure to specify on your order that the intended application is for water storage to ensure the food-grade black inner lining is added to these tanks as our conservancy range is manufactured from recycled material to reduce our destructive waste output.
