# JoJo quality commitment

## We invest in designs, technologies and capabilities that uphold our purpose.

JoJo's popular water tanks comply with the national tank standard for water tanks, SANS 1731:2017 at all eight of our operations, and come with a 40-year-plus track record and 10-year warranty. Each JoJo tank is a quality, long-term investment designed to serve a purpose and add value.

-  UV-stabilised outer layer withstands the harsh African climate
-  Black inner layer prevents algae growth
-  BPA-free, food-grade layer prevents leaching of harmful chemicals and protects the quality of the water stored
-  No vertical joints or weak points in the layers for added strength
-  Greater thickness at the bottom of the tank provides the required strength to withstand the pressure from the liquid stored
-  Closely spaced ribs at the bottom of the tank provides added strength
-  Lids are secured with spring-loaded e-clips as an additional safety measure in the event that the tank overflows
-  Tanks are supplied with high-quality, practical fittings designed for use with our accessory range, to extend the versatility and allow for easy DIY installations
-  Tanks can be manufactured in a range of colours to suit various preferences and unique aesthetic requirements
-  Our colour pigments have the best weather-and light fastness properties for extended outdoor use without fading
-  Iconic contemporary design with unique sharp lines and finishes

## What is the difference between Septic & Conservancy Tanks?

### Septic Tank

A septic tank is used for the **disposal of sewerage only**. It brings about the digestion of organic matter and **discharges the black water into a French drain** to soak away into the ground over time. It requires minimum maintenance, as each component has a specific function and is designed accordingly.

### Conservancy Tank

As it is **chemical-resistant**, a conservancy tank is **used for the disposal of both black and grey water**. It serves as temporary storage only, **requiring the waste to be pumped out whenever the tank is full**. This is done by licensed hauling companies who dispose of the waste accordingly.

Note: JoJo manufactures its septic and conservancy tanks from recycled plastic in order to reduce destructive waste output. They are therefore not suitable for the storage of water for potable purposes.
